OBSTETRICAL ULTRASOUND EVALUATION

YOUR INSTITUTION NAME GOES HERE

PATIENT	: WILLEMS, PEGGY M.	**DATE**	: 8/3/17
CODE/ID	: 565238410	**LMP**	: 10/29/16
REFERRING PHYSICIAN	: REFERRING PHYSICIAN NAME	**GRAVIDA**	: 2
DATE OF BIRTH	: 9/1/90	**PARA**	: 0
REPORT ON FETUS	: A		
INDICATION	: DETERMINE FETAL WEIGHT		

TECHNICAL FINDINGS

Multiple planar views of the pelvis demonstrated a normal uterine myometrium and an essentially normal cervix. The left and right adnexa were not adequately visualized.

There is a single living intrauterine pregnancy which is seen in ***breech*** presentation and longitudinal lie. Regular Cardiac Rhythm is demonstrated. The fetal heart appeared to contain four (4) chambers. There were fetal breathing movements observed. Normal fetal limb and bodily motion was observed. There was no visualized deformity of the fetal cranium. The intra-cranial structures appeared normal. All portions of the fetal spine were unremarkable. The fetal spine is to the maternal left. The upper and lower extremities were imaged and appeared unremarkable. There was a normal volume of fluid imaged within the fetal stomach. The fetal urinary bladder contains a normal volume of fluid. The umbilical cord insertion site was visualized and displays no pathology. A three (3) vessel cord was seen. The right kidney appeared normal. The left kidney appeared normal.

The Placenta is Grade-II, left laterally seen. .There is no evidence of placental separation. Qualitatively, the ***amniotic fluid*** volume appears to be ***excessively high*** .The fetal gender was not identified during this examination.
